BAXENERGY ITALIA S.R.L.

- 📍 Via Sclafani, 40/b
95024 Acireale (CT) - Italy
- ☎ +39 095 1695 7402
- ✉ info@baxenergy.com
- 🌐 www.baxenergy.com

Founded in 2010, BaxEnergy is a multinational company with over 80 employees.

We are based in the Free Mind Foundry Campus, an International Cooperation Hub in Sicily.

Our team combines an extensive domain expertise with the latest intelligent technology to develop Asset Performance Management (APM) systems and Renewable Energy Management Systems (REMS).

Our company offers leading multi-vendor cross-functional IoT operating software technology for visualizing, analysing & optimizing operations in wind, hydro, solar, geothermal, and combined cycle power plants. The technology also supports battery storage technology and can be used to monitor and control the production of green hydrogen and green ammonia. BaxEnergy targets

operators and asset managers of renewable infrastructure assets. Over time the company has interconnected over 120 GW of renewable energy (wind, solar, hydro and geothermal), in over 40 countries, monitoring more than 200,000 different generation units and 10 million data signals. The company's product platform is used by Executives, O&M Managers and Field Technicians and integrates with a variety of external power forecasting, energy trading and price prediction systems. BaxEnergy's monitoring platform is being extended outside the space of renewable energy to cover monitoring of combined cycle power plants, and hydrogen production facilities.

BaxEnergy's solution is capable of generating savings and recapture revenues ranging from 1.5% to 4.5% of the yearly gross production.

BIP

🏠 Northern & Shell Building, 10 Lower Thames St,
London EC3R 6EN, Regno Unito

ESPE S.P.A.

🏠 Via dell'Artigianato, 6
35010 Grantorto, PD - Italy

☎ +39 049 9455033

✉ espe@espe.it

🌐 espe.it

Experience, dependability, innovation: in a continued growth since 1974, at ESPE we specialize in the realization of highly efficient and innovative industrial electric systems, along with being among the main Energy System Integrators on a national level.

Industrial electric infrastructure, photovoltaic solutions for businesses, small wind power and biomass systems: wherever there may be need for energy, we are dedicated to producing and managing it with the right installation suitable for every need.

FDUEG S.R.L.

FDUEG
Special and dry type transformers, reactors and engineering

- 🏠 Via Garibaldi, 24
13030 Ghislarengo, VC - Italy
- ☎ +39 0321 824131
- ✉ info@fdueg.com
- 🌐 www.fdueg.com

FDUEG was founded in 1995 thanks to the partners' experience. We are a group of professionals with over 25 years of experience in the electromechanical sector.

Since then it is an important Italian Company that produces power transformers, special transformers, air core and iron core reactors, active and passive filters.

Thanks to the know-how of highly specialized engineers and technicians, FDUEG has sold products and systems in over 45 countries worldwide.

The production sites are located in Italy, in the provinces of Novara and Vercelli in Piedmont.

Customer is king. Even since its foundations the company has found a niche in various sectors where machines for particular applications that require highly-competent design are needed. In his history it has built lasting relationships with some manufacturers of power electronics and has developed competitive solutions. FDUEG has a dynamic structure focused on a UNI EN ISO 9001:2015 certified Quality System.

RINA CONSULTING S.P.A.

🏠 Via Cecchi, 6

16129 Genova, GE - Italy

☎ +39 010 31961

✉ info@rina.org

🌐 www.rina.org

RINA, through its Energy team, has extensive international experience in a wide range of engineering and consulting services, inspection, quality assurance and quality control, site supervision and certification.

We work with operators, project developers, banks and investors, and EPC contractors, from concept to the plant operation to maximise their operability, reliability and safety, reducing the risks for human life and the environment and at the same time minimising maintenance costs, supporting customers through shut down and decommissioning.

Services are provided for plants and infrastructures in the energy sector, from oil & gas and power generation plants (including conventional, nuclear and renewable sources) to transport and distribution infrastructures, and for systems and infrastructure. Skills on such diversified plants and systems, combined with skills in the fields of permitting, HSE and materials make RINA a primary player in the energy transition underway.
