KLEOS is born from the solid foundation of an eternal stone, emerging once again between ancient rock walls shaped by time.

This material, which once built empires, continues to shine on the global stage today. KLEOS represents that special moment when Roman Travertine, after a long wait, meets human creativity to create truly unique works of art. In a dedicated workshop, guided by Elisabetta, blocks of stone are carefully selected and transformed into something new, a symbol, an emotion.

KLEOS's forms bring together and blend different disciplines and cultures, reborn through an incredibly versatile material. These art and design creations offer a fresh perspective on the world.

Marmi Faedo is an Italian company based in Vicenza, upholding a centuries-old tradition and owning an exclusive quarry.

They mine their unique stones, Grolla and Grigio Olivo, hard limestones formed in a long-dormant volcano. The technical characteristics are exceptional: water absorption is less than 0.3% and porosity is 0.5%.

This composition makes the materials stain-proof, frost-resistant, impervious to salt/chlorine, and resistant to air pollutants due to high density. They are available in three colors.

The stones are ideal for exterior cladding, paved areas, and swimming pools. The offerings include custom-sized cuts, large objects (sinks, bathtubs), and thin slabs (1 cm)

Pes Stone was founded in Sardinia in 1990. We specialize in the extraction, processing, and sale of the finest local stone materials such as basalt, granite, marble, and trachyte.

We create urban and residential projects, including roads, squares, interior and exterior paving, stair and wall cladding, furnishing accessories, architectural and design elements, to bring the elegance of nature's stones into homes and cities.

Our company is structured to operate throughout Europe with short processing times and fast deliveries for all categories:

- Public Entities
- Companies
- Private and Residential Sectors

## Cladding, curbs and Split flooring

The cleft finish gives natural stone an irregular and rustic surface, ideal for exterior cladding such as walls, fences, and pillars.

This technique enhances the natural beauty of the material, creating light and shadow effects that enrich the aesthetics of the space.

The tradition and passion for stone craftsmanship in Ittiri have always been deeply rooted in history. By the end of the 19th century, more than 500 stonemasons were extracting and working the trachyte blocks found in our territory, decorating and enhancing not only our town and our homes, but also many surrounding villages and cities.

Thus, in the early months of 2004, Trachite Artigiana was founded – a young and flexible company aimed at consolidating its position in the market as one of the leading trachyte and natural stone sawmills in Sardinia.

The extraction and processing of different types of trachyte, basalt, and other natural stones allow us to handle large quantities and offer a wide range of colors, making our stones a valid alternative to granite and marble.
