vasinofrabircs

We study, design, create and produce fabrics for fashion and interior design. We start with an idea, an inspiration, and together with our clients we create tailor-made projects, unique fabrics that express a style by interpreting it. At the centre of our work is the constant search for style and excellence, and we are never satisfied. We draw from the past thanks to our historical archives, which represent the craftsmanship of the past, but we are oriented towards the present and the future thanks to the most innovative and advanced technology of our weaving machines.

www.fec-serilabel.it
fec_serilabel

Fec*Serilabel is based in Italy, Bergamo and is leader in the manufacturing for: leather labels, labels in synthetic materials with hot printing, screen printing, plastic relief, microinjection and high frequency with different supports and metal plates, stickers, lenticular 3D and NFC technology. We have also new patented systems (Vacuum assembly & F*S Fixing System). Our company has been operating in the fashion industry since about 40 years and all our items are rigorously and totally made in Italy. We provide a wide range of production processes: hot stamping, screen printing, high frequency and micro-injection, application of metal parts, decorative stitching and treatments for dyed on cloth and washing protection. Among all our articles, what stands out most is our patented fixing system that allows us to apply metal elements and more, on any type of material, avoiding the classic back plate, thus guaranteeing greater flexibility, lightness and an extreme resistance which also exceeds 7 consecutive dry cleaning tests with a flawless result. Our family-run companies are dynamic and oriented toward growth and innovation; we are proud to be able to satisfy all customer needs. Our name is a guarantee of quality and service. As a matter of fact, since longtime we are working with major names in the Italian and International fashion industry.We have also new patented systems (Vacuum assembly & F*S Fixing System).

ELASTICS & FABRICS

MAB designs and manufacture textile solutions in Italy, bringing together industrial expertise, research and a strong sense of sustainability. We follow each project from color development and material construction to the finishes that define its function and identity: composition, source, silicone grip, printing, debossing and lamination. Custom dyeing is at the heart of our approach, with a clear path from the first color sample to production. We work alongside designers, product teams and brands to find the right balance of comfort, freedom of movement and performance. Every development begins with a real need and becomes a solution shaped for the garment, the person wearing it and the character of the collection.
