China Launches Industry-Education Alliances in Key Sectors

China launched four national industry-education alliances, targeting machine tools, grain, railways, and new energy vehicles. Supported by the Ministry of Education and leaders like BYD, 50 partners signed 24 major projects. The initiative pledges 600 million yuan annually for R&D and talent training, while opening 105 production scenarios to colleges. **(Ministry of Education)**

China Outlines Education Goals for 15th Five-Year Plan

China's Ministry of Education outlined key targets for the 15th Five-Year Plan (2026–2030). By 2030, the nation aims to deliver more equitable basic education, expand degree capacity, and propel top universities into world-class ranks. Major priorities include integrating AI into education, expanding vocational training, and supporting teachers. **(Ministry of Education)**

Xinjiang Unveils 2027 Gaokao Reform Plan Featuring "3+1+2" Model

Xinjiang has officially released its 2027 college entrance examination plan, formally introducing the "3+1+2" exam model. Scheduled for June 7–9 with a 750-point scale, the system uses raw scores for core subjects and grade-converted scores for electives. Admissions will transition to an "Institution + Major Group" model across four main batches, offering candidates up to 45 preference choices in the main undergraduate batch. **(Xinjiang Education Department)**

Leadership Adjustments at Three Top Beijing Universities

Three Ministry of Education "211 Project" universities in Beijing updated their leadership teams. Liu Wei was appointed Deputy Party Secretary and Discipline Inspection Secretary at Beijing Jiaotong University, while Wang Wenwen became Deputy Party Secretary at Beijing University of Posts and Telecommunications. Meanwhile, Zhu Lingyun took the same dual leadership roles at North China Electric Power University. **(Education Online)**

Beijing Outlines Education Plan for 15th Five-Year Period

The Beijing Municipal Education Commission released its 15th Five-Year Plan, targeting high-level modernization by 2030 and global education hub status by 2035. Outlining 38 tasks across 12 domains, the strategy highlights an "AI + Education" highland, quality basic education, and regional cooperation. It also aligns resources with urban demographic shifts. **(Sina)**
