Federazione ANIE

Speaking for

ITALIAN ELECTRICAL ENGINEERING
AND ELECTRONIC INDUSTRY

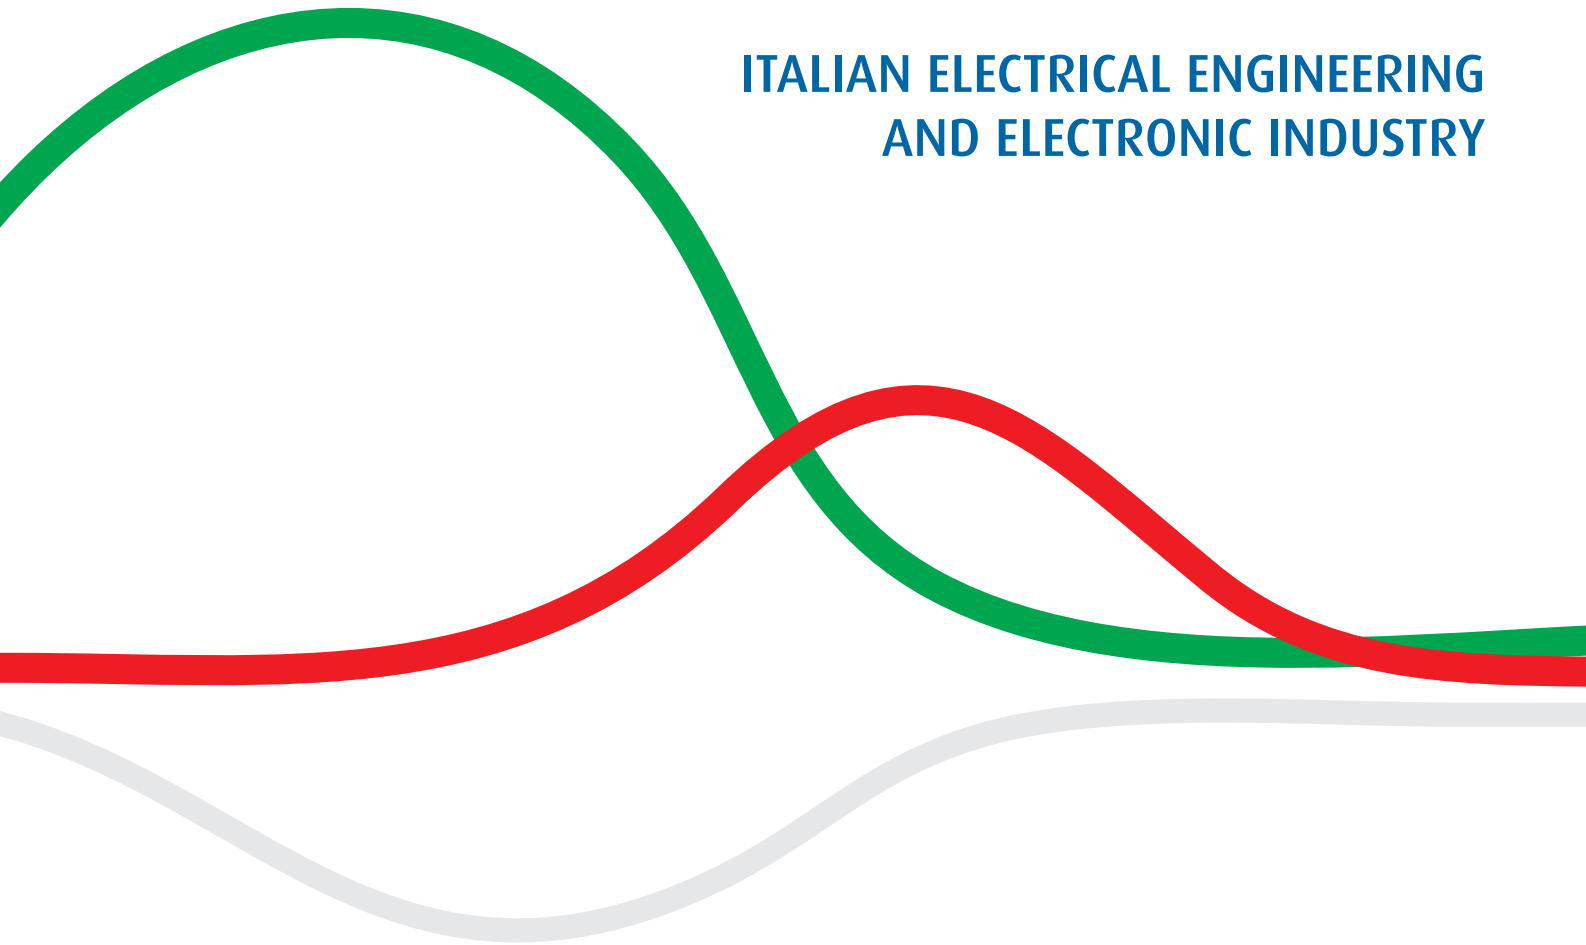

Federazione ANIE

Speaking for

ITALIAN ELECTRICAL ENGINEERING
AND ELECTRONIC INDUSTRY

AT THE HEART OF THE SYSTEM

ANIE has been representing the Italian electrical engineering and electronic industry within Confindustria since 1945.

With over **1,400 member companies** the Federation brings together strategic players from the industry in Italy, characterised by high levels of research and innovation that contribute to the Country's growth and success in international markets.

Through intense lobbying of national and EU institutions, **ANIE** and its Associations seek to encourage and strengthen entrepreneurial values, promoting the capacity for their development in pursuit of the general interest of the Country. **ANIE** cooperates with prestigious Italian and international technical bodies and plays a significant role within them.

ANIE is part of **Orgalim**, the European Engineering Industries Association

ANIE is a member of the main national standardization bodies (**CEI**, **UNI** and **CTI**)

ANIE contributes to the work of the European bodies (**CENELEC** and **CEN**) and international bodies (**IEC** and **ISO**)

ANIE is a founder member of **IMQ**, Italian Institute for Quality Mark

ANIE is also...

RESEARCH & INNOVATION

THE FUTURE IS ALREADY HERE

The technology industry has always been focused on innovation, making up over 30% of private Italian investment in R&D. Research & Innovation is fundamentally important for maintenance of the Country's competitiveness and safeguarding of manufacturing activities in the industries that ANIE represents.

EDUCATION

THERE'S NO INNOVATION WITHOUT EDUCATION

The objective is to reduce the gap between the technical skills that the industry needs and the training that is being provided. This is why the mission of a technology industry focused on innovation and market challenges must be characterised by close dialogue with the education system and universities. This is the starting point for building the technological industry of tomorrow.

ANIE is a dynamic organisation, the acknowledged representative of its stakeholders, who are influential in Italian and foreign infrastructure policy. Its objective is to contribute towards the development of the market for electrical engineering and electronic businesses, acting to ensure transparent rules. **ANIE** is a privileged meeting place for Member Companies, offering the chance of ongoing dialogue on the issues of greatest interest regarding company growth and competitiveness, with reference to the various factors of production.

FOLLOW ANIE FEDERAZIONE

ELECTRICAL ENGINEERING

ANIE ENERGIA
Italian Energy Industry Association

POWER PRODUCTION

Power Plants and Components; Generating Sets; Micro Grid and distributed generation; Electrical Energy Storage Systems.

POWER TRANSMISSION & DISTRIBUTION

High Voltage Switchgears and Controlgears; High Voltage Substations; High Voltage Power Lines; Insulators and Insulating Materials; Fittings; Poles and Towers; Power Transformers; Medium Voltage Switchgears and Controlgears; Medium Voltage Switchboards; Instrument Transformers; MV/LV Substations; Protections Relays; Smart Grid; Distribution Transformers; Medium and Low Voltage Power Lines and optical fiber.

POWER SOLUTIONS FOR INFRASTRUCTURE, INDUSTRY AND TRANSPORTS

High Voltage Electric Motors and Drives; Low Voltage Electric Motors; Alternators; Low Voltage Controlgears; Low Voltage Switchgears; Low Voltage Switchboards; Electrical Cabinet for H.I.M.; Busbars; Power factor and industrial applications capacitors.

ANIE RETI
Italian Association for Energy, Transport and Communication Networks

ANIE Reti represents utility network companies operating in Italy in the fields of energy, transport and communication. Members of ANIE Reti are also manufacturers, distributors, installers of components and technology solutions for utility networks.

ANIE RINNOVABILI
Italian Renewable Energy Industry Association

RENEWABLE ENERGY

Manufacturers of components and/or turnkey power plants; O&M service Providers; Energy Management System Manufacturers and Service Providers; Power Producers in Italy and abroad in the renewable energy sector: Bioenergy, Wind, Photovoltaic, Geothermoelectric, Hydroelectric, Concentrated solar power.

ASSIFER
Italian Railway Industry Association

ELECTRIFIED TRANSPORTS

Electric and Diesel Locomotives, Electric Trains, Carriage, Freight Wagons, Tramways, Subways; Signalling and Automation systems; Railway electrification.

ASSOASCENSORI
Italian Lift and Escalator Association

LIFTS AND ESCALATORS

Design, manufacture of systems and/or their components, installation, servicing and repair of Lifts, Escalators and Moving Walks, Stair Lift systems and Home Lifts.

Associazione Nazionale
Produttori Illuminazione

ASSIL
National Lighting Manufacturing Association

LIGHTING

Luminaires; Components for Luminaires and Lighting Systems; Lighting Sources and LED.

AICE
The Insulated Cable and Wire Industry Association

CABLES

Low Voltage Power Cables; Medium Voltage Power Cables; High Voltage Power Cables; Accessories for LV Cables; Accessories for MV Cables; Communication Cables; Winding Wires.

ASSOCIAZIONE
COMPONENTI
E SISTEMI
PER IMPIANTI

CSI
Italian Association for Components and Devices for Electrical Installations

COMPONENTS AND DEVICES FOR ELECTRICAL INSTALLATIONS

Components for Electrical Installations; Protective Devices; Conduits; Household Intercom, Videointercom and CCTV; Forced Ventilation; Gas Detectors; Home and Building Automation; SPD-Surge Protective Devices; Electric and Electronic Testing Instruments; Batteries (Automotive and Industrial); Portable Batteries; Gas Static Smart Meters; Water Static Smart meters; Multiservice Gateway.

APPLiA Italia
Italian Association of Home and Professional Appliances, Food Service and Hospitality Manufacturers

HOUSEHOLD APPLIANCES AND FOOD SERVICE AND HOSPITALITY

Major domestic appliances (refrigeration, washing, cooking); Small appliances; Electrical water heaters; Chimneys; Components; Wood and pellet heating; Hoods; Food service and hospitality.

ANIE COMPONENTI ELETTRONICI
Italian Electronic Components Association

ELECTRONIC COMPONENTS

Discrete Semiconductors; Integrated Semiconductors; Hybrid Circuits; Printed Circuits Boards; Capacitors; Resistors; Inductors; Connectors; Electronic and Electromechanical Micro Relays; other Electronic Components.

ANIE AUTOMAZIONE
Italian Factory and Process Automation Association

FACTORY AND PROCESS AUTOMATION

Variable speed drives; Brushless Motors; Human machine interface; Industrial PC; Software; Programmable logic controller; Distributed I/O; Instrumentation and sensors (encoder, industrial wireless, safety, vision systems, industrial networking); Remote control and automation systems for public utility networks; Intelligent transport systems; Uninterruptible Power Supply (UPS); Mechatronics; Field Instrumentation; Flow measurement systems; Distributed control systems.

ANIE SICUREZZA
Italian Association for Security, Electronic Fire Safety and Building Automation

SECURITY, FIRE SAFETY AND BUILDING AUTOMATION

Security Systems (antintrusion; thief proof device; access control; CCTV); Automatic Fire Detection Systems; Voice Alarm Systems; Building Automation Systems; Building Management and Security Services.

ANIMP
Italian Association of Industrial Plant Engineering

ANIMP represents Engineering & Contracting companies, SME's that supply materials and services, installations and fittings, end-users, academics, experts and researchers. All of them are involved in designing and building industrial systems, large-scale projects and infrastructure.

TECHNOLOGICAL CONNECTION

ANIE PROVIDES ACROSS THE BOARD SUPPORT TO COMPANIES REGARDING THE CURRENT AND FUTURE CHALLENGES OF THE TECHNOLOGY INDUSTRY.

ENERGY EFFICIENCY

Energy efficiency is the intelligent use of energy, allowing performance that pays heed to environmental sustainability. Energy saving is today an absolute priority for industry, transport and domestic consumption. Energy efficiency is the prime objective of ANIE companies, the keystone for building a lower environmental impact economy, and an objective that may be achieved through full, across the board application of ANIE technologies.

*NO WASTE BEING
THE WATCHWORD*

*TECHNOLOGY
ENABLING
INTELLIGENT
NETWORKS AND
CITIES*

SMART GRIDS AND SMART CITIES

The smart revolution applied to electrical grids and urban areas is born out of technological innovation. This is the fundamental driver in achieving sustainable urban transformation. Only with technological and innovative solutions supplied by the technology industry is it possible for there to be a practical implementation of more efficient and intelligent electrical grids, buildings, transport and communications systems. Convergence, interoperability and growing sustainability are the principal guidelines that are forging the new smart development model. ANIE technologies lie at the heart of the intelligence and efficiency that is changing the world that surrounds us, from infrastructure networks, through Building Systems to cities.

INTELLIGENT BUILDING

Intelligent Building is a system of integrated technologies enabling a new concept of the qualitatively and technologically advanced building. Intelligent buildings are a reality today thanks to ANIE technologies. Buildings are reinvented through integrated systems with the enabling and propulsive force of advanced technological installations. There is therefore a new approach to building infrastructure that looks to energy efficiency, sustainability, usability and security, in order to construct an advanced urban habitat, through open and integrated technology platforms.

*IN THE INTELLIGENT
BUILDING,
TECHNOLOGY IS ON
HOME GROUND*

E-MOBILITY

E-mobility means sustainable mobility, in line with the European objectives for 2020-2030. Mobility can only be made “greener” and more efficient with transport systems that use innovative technological solutions ever more pervasively. This is where ANIE technologies come in, leading the electronic revolution in transport systems through an integrated approach, from applications on board vehicles to systems for the reloading infrastructure.

GREEN FOR GO

*MECHATRONICS
SPRINGS FROM
ACROSS THE
BOARD
INNOVATION*

MECHATRONICS

On modern industrial production lines, mechanics and electronics interact in ever more integrated fashion in order to achieve greater process efficiency and promote industrial energy saving and sustainability. This is known as Mechatronics, a term that indicates the transverse nature of the technologies involved, and their ability to respond to trends that are continually changing. Mechatronics is a high potential “frontier” market.

SAFETY

Safety is the prevention of risk and the raising of qualitative standards, and at the same time encapsulates Safety & Security aspects. Demand for safety is on the rise, from transport systems to communication networks, from workplaces to shared spaces, as is likewise the technological offering that can provide it. The ANIE System provides for these technologies an integrated and convergent vision, in order to build a safer world, in industrial, residential, service-industry and geographical spaces.

*INTEGRATED
VISIONS OF
A SAFE WORLD*

*CLEAN, ZERO
IMPACT ENERGY*

RENEWABLE ENERGY

Renewable energy is clean and inexhaustible and does not deplete natural resources. Choosing sustainable energy production means allowing the Country to free itself from fossil fuel sources, promoting the development of a reduced environmental impact energy mix. ANIE technologies allow development of a new energy balance, and integration of renewable sources within the electricity system. ANIE’s actions are consistent with European objectives defined for 2030 by the Clean Energy Package, and its investments are made with them in mind.
