FUTURE ENERGY ASIA 2022

Bangkok, July 20th – 22nd, 2022

Welcome Address by the Ambassador of Italy to Thailand

Dear visitor's

Energy is at the forefront of the debate in recent times because of worrisome developments on a global scale, from the climate crisis to geopolitical crises. Already since 2021 Italy's strategy in the Recovery and Resilience Plan in the framework of the EU NextGen has a key component dedicated to the energy transition, and particularly to renewable energy, hydrogen and sustainable mobility. The component primarily deals with the production and distribution of energy, encouraging the use of renewable sources and providing the necessary infrastructure for their integration into the national electricity system and for powering electric vehicles as well as the exploitation of liquid hydrogen. These actions, funded by the National Recovery and Resilience Plan, will contribute to the achievement of the EU's objectives, made even more challenging by the revision of the existing European legislation (Fit for 55 package).

Thailand has for its part made a surprise move at COP26 in Glasgow as it has announced that it will level up its mid- and long-term targets on GHG emissions reduction, aiming to accomplish the net-zero emissions by 2050 with the mid-term target raised to 40% if it is to gain support from the international community. The energy transition is a central part of Thailand's strategy to reach net zero.

On this background, I am delighted to welcome the Italian companies participating in this year's Future Energy Asia 2022, which has become a main regional event, eight outstanding Italian companies active in the energy sector.

I wish them every success in their activities while I renew the Embassy's full readiness, together with the Italian Trade Agency in Bangkok, to support them in their prospects of business in Thailand, but also in Cambodia and Laos.

Lorenzo Galanti

Ambassador of Italy to the Kingdom of Thailand

Welcome Address by the Trade Commissioner of Italian Trade Agency Thailand

Dear visitors,

For this year's Future Energy Asia 2022 event, I would like to warmly invite every related party to Asia's most well-known energy transition and transformation exhibition.

Energy is one of the most active industries in Italy, and it plays a significant part in the Italian economy. The Italian Trade Agency (ITA) will continue to support Italian companies participating in Future Energy Asia 2022, believing that the event would serve as a platform for interacting with ASEAN and greater Asian markets.

I am glad to inform that our office will once again coordinate the Italian pavilion, which will host eight significant Italian energy enterprises who serve as contractors for industrial plants or which products are linked with the following sectors such as steam boilers, power cable accessories, renewable energy supply, flares and combustion technology, test and measurement equipment, electric submersible pumps, and consulting services.

Moreover, this catalog offers an overview on the companies that comprise Italian Pavilion as exhibitors, as well as their products and contact details. I am certain that these firms will be great representatives of Italian energy companies, and I invite you to visit our pavilion to meet them. As the Italian Trade Commissioner, I will be present at the Italian pavilion, along with my team, to provide any additional assistance and to facilitate business contacts between you and the participating companies.

I genuinely wish you a great experience at Future Energy Asia 2022.

Giuseppe Lamacchia

Italian Trade Commissioner in Bangkok

L'ICE-Agenzia per la promozione all'estero e l'internazionalizzazione delle imprese italiane è l'organismo attraverso cui il Governo favorisce il consolidamento e lo sviluppo economico-commerciale delle nostre imprese sui mercati esteri. Agisce, inoltre, quale soggetto incaricato di promuovere l'attrazione degli investimenti esteri in Italia. Con una organizzazione dinamica motivata e moderna e una diffusa rete di uffici all'estero, l'ICE svolge attività di informazione, assistenza, consulenza, promozione e formazione alle piccole e medie imprese italiane. Grazie all'utilizzo dei più moderni strumenti di promozione e di comunicazione multicanale, agisce per affermare le eccellenze del Made in Italy nel mondo.

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy.

With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses. Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world

ELPOWER's mission is to provide its clients with a comprehensive service characterized by flexibility and quality which are based on highly reliable products. They are obtained through constructive solutions that are original and technologically advanced. Thanks to the specific experience of its designers and its flair for innovation, ELPOWER is the ideal partner for those who are looking for inverters which combine efficiency, performance, and reliability in the renewable energy field.

ELPOWER designs, produces, and sells inverters for renewable energy and PCS for Energy Storage in a power range from 15 kW up to 500 kW. Thanks to its own remote-control kit ELPOWER can supply a plug and play solution, easy to be installed and monitored in remote areas.

ELPOWER can provide solution both for on-grid and off-grid, with grid forming, UPS and black start capabilities.

ELPOWER already installed in Thailand PCS for microgrids projects with different topology of batteries.

Contact: Lorenzo Magnavacca, lmagnavacca@gba-flares.it

GBA provides turn-key combustion solutions to help our customers to safely dispose hazardous compounds in a safe and energy-efficient manner.

As an internationally based company, we design and supply flare systems, thermal oxidizers, and other enclosed combustion units for any kind of application in the Oil & Gas and Petrochemical Industries, chemical plants, power stations, etc.

Our flare systems cover the whole spectrum of flaring applications including high pressure low radiation sonic flare tips, steam assist smokeless flares, totally enclosed ground flares and flare support structures to over 200m high.

Our enclosed combustion units include SRU Tail gas incinerators, SRU Claus Reaction Furnaces, Regenerative Thermal Oxidizers (RTOs), Vapor Combustion Units (VCUs), Catalytic oxidizers, Combustors, and Enclosed Flares.

Our references are extensive and incorporate most of the world's majors' end-user's companies and leading EPC companies, making GBA an excellent business partner, highly competent, dependable, and trustworthy, for your business.

Officine di Trevi is specialized in the production of electric submersible pumps with OFT trademark since 1968. Nowadays OFT brand includes a wide choice of pumps ranging from drainage, 3", 4", 5" and 6" diameter. We are European leader in the manufacture of submersible ATEX certified electric pumps, suitable for use in potentially explosive places, for pumping contaminated liquids, landfill leachate and hydrocarbons. Pumps are customized according to the liquid (up to 80°C) and the conditions of the installation site. In case of charged liquids, we propose pumps with floating impellers able to resist even the presence of solid particles suspended inside the liquid. We have ready-to-use All in One solution, composed by pump, electrical control panel and accessories for liquid's level control.
