# WELCOME TO ITALIAN PAVILION

LIMA'25  
LANGKAWI

Booth Number:  
B004

Italian Trade Agency (**ITA**), Italian Ministry of Foreign Affairs and International Cooperation (**MAECI**) and Embassy of Italy in Kuala Lumpur, in collaboration with Italian Ministry of Defence – Italian Secretariat General of Defence and National Armaments Directorate (**SGD**) and Italian Industries Federation for Aerospace, Defence and Security (**AIAD**), are organizing a collective participation in the 17th Edition of **Langkawi International Maritime and Aerospace Exhibition, LIMA 2025**. This biennial event is one of the largest maritime and aerospace exhibitions in the Asia-Pacific.

Italian aerospace is a dynamic and innovative sector that encompasses a wide range of activities, including aircraft manufacturing, space technology, research and development, and collaboration with international partners. Italy has a strong presence in the global aerospace industry and continues to make significant contributions to the field through its companies, research institutions, and participation in international space programs.

During the Renaissance, Italian maritime technology, and shipbuilding techniques advanced, leading to the construction of advanced vessels such as galleys, carracks, and galleons. Italian navigators and cartographers, such as Leonardo da Vinci and Francesco de Vigo, made significant contributions to maritime science and navigation.

In modern times, Italy has continued to play a significant role in maritime affairs. Italian shipping companies are among the largest and most influential in the world, with a significant share of global shipping trade. Italy also has a

strong navy, known as the Italian Navy, which is involved in various maritime operations, including defence, security, and humanitarian missions. Overall, Italian maritime history is characterized by a legacy of seafaring, exploration, trade, and naval power, which has had a significant impact on Italy's culture, economy, and global influence.

The Italian Pavilion at LIMA 2025 will host 4 outstanding Italian companies offering high quality products and services through industrial partnership in the fields of Aerospace & Maritime Defence as well as the transfer of technology and know-how. In other words, we do not simply offer “Made in Italy” but also “Made with Italy”.

Please refer to the following pages of this booklet for further information about each participant.

Moreover, the Italian Trade Agency (**ITA**) and the Italian Industries Federation for Aerospace, Defence and Security (**AIAD**) are at the disposal of professional trade visitors and government procurement delegations to give any assistance in their research of new products and technologies.

# ITALIAN TRADE AGENCY (ITA)

Booth Number: B004

ITA - Italian Trade Agency is the Governmental agency that supports the business development of Italian companies abroad and promotes the attraction of foreign investment in Italy.

In addition to its Rome headquarters, ITA operates worldwide through a large network of trade promotion offices, linked to Italian embassies and consulates.

ITA provides information, assistance, consulting, promotion, and training activities for the benefit of the Italian small and medium-sized companies and foreign companies as well.

ITA in Malaysia is the Trade Promotion Office of the Embassy of Italy in Kuala Lumpur. It covers a wide range of services, research of business partners, bilateral trade meetings, forum, and seminars with Italian experts, organising Italian pavilions at Malaysian major international trade fairs and exhibitions, accompanying local trade delegations to Italy and visits of industrial plants, etc.

# ITALIAN SECRETARIAT GENERAL OF DEFENCE AND NATIONAL ARMAMENTS DIRECTORATE (SGD)

Booth Number: B004

The Secretariat General of Defence / National Armaments Directorate was established in 1965. It reports directly to the Italian Minister of Defence for administrative issues and to the Italian Chief of Defence Staff for technical and operational matters. It oversees and coordinates all activities of the Ministry's General Directorates. Additionally, it implements the administrative guidelines set forth by the Ministry, manages the procurement of materiel, equipment, and weapon systems for the Armed Forces, promotes and coordinates academic and industrial research related to armaments' technological development, and fosters the Italian defence industry's international footprint.

# ITALIAN INDUSTRIES FEDERATION FOR AEROSPACE, DEFENCE AND SECURITY (AIAD)

Booth Number: B004

The Federation of Italian Companies for Aerospace, Defence and Security (AIAD) was founded in 1947. It brings together virtually all Italian high-tech companies engaged in design, manufacturing, research, and service provision in the civil and military aerospace, naval & UW, land-based and all electronics and equipment capabilities connected to these sectors. AIAD serves as a reference point for Italian and foreign institutions, coordinating activities in defence of national interests. It is a member of the Association of European Aerospace, Defence and Security Industries (ASD) and plays an active role in promoting the Italian industry by coordinating its participation in major international events and organising visits of foreign delegations to Italy. AIAD is also a founding member of the National Aerospace Technology District. It is headquartered in Rome and has an office in Brussels.

SECTORAL ASSOCIATIONS

Booth Number: B004

Davi is a world leader in the production and supply of plate and angle rolling machines, as well as automated rolling systems. With a rich tradition of engineering excellence, we enable manufacturers worldwide to achieve outstanding results in their rolling and fabrication processes across defense, aerospace, space, and naval sectors. Davi plate and angle rolling machines can roll any type of component used in these industries: whatever the material, size, or radius required, the Davi range offers an optimal alternative to present to customers. Whether it's for manufacturing components for armored vehicles, military ships, or aerospace applications in various materials (any type of steel, aluminum, titanium, or other alloys), Davi is capable of providing the ideal rolling machine. Our solutions include both standard machines and highly customized products, supported by a constantly growing and evolving Research and Development division, a unique feature among rolling machine manufacturers.

METAL WORKING

Booth Number: B004

For over 70 years, it has been a global leader in Electronic Defense Systems. Thanks to innovative management of the electromagnetic spectrum, achieved through proprietary and integrated technologies, the brand is now an international group with a multi-domain approach that also covers cyber, space, and biodefense. With extensive experience gained from participating in major European defense programs, including the Eurofighter Typhoon combat aircraft and the FREMM and PPA warships, ELT Group is now present in over 30 countries, with more than 3,000 systems delivered. The company is also involved in projects for the development of the sixth-generation Global Combat Air Programme. ELT Group is based in Italy but has a presence in eleven countries across three continents through commercial offices and strategically important subsidiaries, as well as local operations in Germany and Saudi Arabia. The ELT Group also includes CY4GATE, specializing in cybersecurity and cyber intelligence, and E4Life, the first Italian company specialized in biodefense.

Involve is an innovative Italian company specializing in high-altitude stratospheric balloon missions. Founded in 2021, Involve offers Stratostats®, a pseudo-satellite platform designed for scientific research, environmental monitoring, and telecommunications at altitudes of up to 40 km. With the advanced AI software Neurostar®, the platform autonomously optimizes balloon orientation and positioning, enhancing mission reliability and precision. This system enables long-duration missions, providing high-resolution data for applications such as disaster monitoring, agriculture, and defense, with better accuracy than satellites. Committed to sustainability, Involve is also a B-Corp, striving for a positive environmental and social impact. Its unique technology, leading in Europe, offers efficient and cost-effective solutions for various industries.

# NURJANA TECHNOLOGIES

Booth Number: B004

NurjanaTech is a leading provider of advanced engineering solutions for the defense and security sectors, specializing in systems integration, real-time processing, and multi-sensor data fusion. With a strong foundation in aerospace and space situational awareness technologies, the company develops high-performance systems for automatic target recognition and tracking in dynamic operational environments. Its experienced engineering team drives innovation in drone prototyping, with ongoing research into stealth capabilities and the integration of Edge AI for enhanced autonomy and decision-making at the edge. NurjanaTech's tailored approach—from initial concept through to deployment—ensures each solution meets the specific mission requirements of defense and security clients. By combining technical excellence with a commitment to innovation, NurjanaTech continues to deliver robust, intelligent technologies that advance the future of aerospace, defense, and security operations.
