Italian Trade Agency 

@ITAtradeagency 

ITA - Italian Trade Agency 

@itatradeagency 

Via Liszt 21
00144 Roma (Rm)

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy.

With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses.

Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

ANIMA CONFINDUSTRIA MECCANICA VARIA

✉ affari.internazionali@anima.it

🏠 <https://en.anima.it>

ANIMA Confindustria - Federation of Italian Associations of Mechanical and Engineering Industries, represents within Confindustria companies of the mechanical sector (225.000 employees, 54,06 billion Euro production and 57.0% export share - estimates 2022).

Established in 1914, ANIMA has 31 associations and 1,000 companies, highly qualified in their sectors. Macrosectors and technologies represented:

- Energy production and oil & gas industry;
- Logistics and handling;

- Water and food;
- Industry;
- Building;
- Personal security and safety;
- Metallic products.

ANIMA safeguards interests of the mechanical industry, represents and promotes member-companies and their products in Italy and abroad, supports members both in technical and economic issues. The companies joining ANIMA are strongly committed to promoting the energy transition in their business and production processes. A working group dedicated to research and application of Hydrogen for Energy Production is also active within the Federation.

FEDERAZIONE ANIE

✉ internazionale@anie.it

🏠 <https://anie.it>

Federazione ANIE, member of Confindustria, represents the Electrical Engineering and Electronic companies operating in Italy.

With over 1,300 member companies, the ANIE system supplies

technologies for public and private infrastructures in strategic markets such as energy, transport, industry and building.

ANIE INDUSTRY FIGURES FOR 2021:

76 billion Euros of total turnover

500,000 employees

5% intra-mural R&D expenditure on total turnover

FEDERTEC

✉ federtec@federtec.it

🏠 federtec.it

In the highly developed context where product technology tends to converge, FEDERTEC, the Association representing the Italian industry of Mechatronic Technologies and Components for Fluid Power, Power Transmission, Smart Automation and Control of Industrial Products and Processes, is the point of reference for the industrial automation sector, focused on the integration of the different technologies and aimed at representing the entire value chain.

After the establishment of FEDERTEC in 2019 thanks to the merger of ASSIOT (Italian Transmission Elements and

Gears Manufacturers Association) and ASSOFUID (Italian Fluid Power Association), also FNDI (National Federation of Industrial Distribution) has been incorporated into FEDERTEC from April 2022, adding a new piece to the mechatronic technologies chain.

The member companies of FEDERTEC represent a leading part of the Italian economy and together, they show very remarkable values, with a global sector turnover exceeding 14 billion euro and a national market value of 10 billion euro at the end of 2022. Over 60% of Italian production is exported, corresponding to an amount of 8.7 billion euro, with a significant contribution to the trade balance of the sector, registering a positive value of 3.8 billion euro.

ITALIAN COMPANIES

A.S. CARLO SAPORITI

✉ info@saporitisrl.it

🏠 <http://www.saporitisrl.it>

We produce manual and electric hoists, trolleys and winches, in standard version or in ATEX version.

With the help of specialized technicians we meet customer needs by providing custom machineries.

We are italian manufacturer of lifting equipment since 1949.

BASIS PLANT SERVICES

✉ plant@basisgroup.com

🏠 <https://www.basisplant.com> 🏠 <https://www.basisgroup.com>

Basis Plant Services Srl is an independent service provider working in Oil & Gas, Energy, Heavy Industry, and Manufacturing Industry fields. With over 20 years of experience and 6 international offices our Team of more than 200 qualified technicians and operators deliver worldwide customer-focused solutions with a forward-looking approach.

Our 3 Business Units are specialized in a wide range of activities:

- Business Process Outsourcing services from Supply chain activities to Data Management for O&G, Power Generation and Manufacturing Industry.
- Quality Inspections, Expediting services and Project Quality

Management for Oil&Gas and Power Generation Industry.

- Technical Field Services on rotating equipment manufactured by major OEMs for EPC and Oil&Gas companies, Heavy Industry and Power Generation plants. Internal Technical Training on Oil&Gas and Heavy Industry equipment.

Our purpose is to guarantee a flexible, reliable and competitive partnership to our customers giving them a step by step support to enhance processes, save resources and face the challenging transformations of 21st century Global Market.

To be part of Basisgroup SpA, which includes Information Technology and Software development companies, add a remarkable value to our services giving us the opportunity to shape innovative solutions according to the specific requirements of our customers.

BERTINEX

✉ commerciale@bertinex.eu

🏠 <https://www.bertinex.eu>

Bertinex Srl - based in Italy close to Milan, is specialized to tailor made convert standard equipment into safe performances to be operated within environments, where could be present a potentially flammable or explosive atmosphere. The activity of Bertinex is mainly concerning three international Markets:

- Ex-conversions of forklifts, lifting platforms, floor washers and other industrial equipment for chemical, petrochemical and pharmaceutical industry.

- Supply of diesel motorized skids to produce electrical, hydraulic or pneumatic power in the Oil & Gas sectors – off-shore and on-shore.
- Ex-conversions in conformity with Atex Group I of machines for excavation of Coal Mines and of firedamp classified tunnels.

Bertinex Production process is certified by one of the most reputable Notify Body in Europe, both for Atex and IECEx applicable directives.

We are exhibiting in OE Aberdeen 2023 to explore the UK market developments after Brexit time.

Try our service, you will note the difference.

CAAST

✉ acquisti@caast.it

🏠 <http://www.caast.it>

CAAST SEALING TECHNOLOGY

Since 1998 Caast S.p.A. designs, searches, develops, and manufactures high performance tailored sealing solutions to secure the needs in mostly every sector of industries.

CAAST offers a wide range of products and materials specifically designed and tested for Offshore platforms and extraction wells, compressors, manifolds, pipelines and slew rings, actuators, safety valves, accumulators, cylinders, advanced filtration systems.

Our passion and our experience are focused on technical research and development of new applications to push forward the limit of what is nowadays considered “standard” in the market.

CAAST ENSURES:

- Full traceability of materials
- Quality controls according to the most severe standards

- Technical support on developing new applications
- Customized Test on materials according to End-user requests.

VALUE PROPOSITION

TURNING/MOLDING TECHNOLOGY

Turning and moulding technologies with innovative machines are successful in the most demanding heavy duty applications

CUSTOM TAILORED SOLUTION AND DESIGN

CAAST offers highly customized solutions to secure the needs of its customers and to obtain the best performances for their applications

THE MOST FLEXIBLE TECHNOLOGY FOR SEALS PRODUCTION

Our production technologies are focused on fast track delivery and fully customized items from small volumes to medium-large series.

XXL SEALS

We can machine or mould in one piece seals of up to 3 m large diameter and more upon request.

CDB ENGINEERING

✉ info@cdbengineering.com
 🏠 <https://www.cdbengineering.com>

CDB Engineering is a dynamic and consolidated Italian company founded in 2000, capable of designing, manufacturing and supplying a wide range of products for the energy industry.

CDB can cover all phases of engineering: process and mechanical design, manufacturing, testing, painting and packing. All activities are carried out in-house. Full commitment in achieving and maintaining high quality standards, enabled CDB Engineering to obtain the most

important international certifications, including ASME "U" Stamp, PED, ATEX, API6D, API6FA and TR/CU, as well as accreditation from the main international EPC Contractors and End Users.

CDB Engineering can provide a wide range of products, precisely:

- Steam Line;
- Plug Valves;
- Strainers and Sight Glasses;
- Process Equipment;
- Process Packages.

CELME

✉ sales@celmetransformers.com
 🏠 www.celmetransformers.com

CELME is an Italian company designing and producing oil-insulated electrical transformers since 1964. Our core business is bespoke manufacturing.

With a production range reaching 63MVA and 145KV insulation class, thousands of our transformers are installed in more than 70 countries.

Our solutions comply with the most stringent technical specifications and precise certification such as UL, ANSI NEMA, IEEE, CSA, UL,

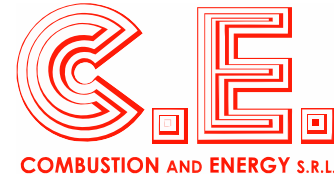

ATEX, IECEX, RETIE, NAVAL REGULATIONS.

We are serving three main sectors:

- - Oil and Gas: Upstream, Midstream and Downstream, safe and hazardous area;
- - Industrial and Power Conversion: MultiPulse and STATCOM transformers for specific working cycle and heavy loads;
- - Renewable: large utility scale, PV systems and for BESS (Battery Energy Storage System), with integrated solutions in skids and containers.

CELME is ISO9001, ISO140001 certified company.

COMBUSTION AND ENERGY

✉ info@ce2k.com

🏠 www.ce2k.com | www.luxsolar.com

Combustion and Energy is a dynamic engineering company established in 1988 to meet the process and engineering requirements in combustion, energy, chemical, petrochemical plants and hazardous areas in general. The importance to provide customers with cost-effective complete systems has led C.E. to start designing its own certified line of Ex Enclosures, including Ex db IIB + H2, suitable for hydrogen systems. In addition, C.E. offers a series of accessories for installations in Ex zones, such as junction boxes, control stations, connection boxes and instrument boxes.

The familiarity with the theme of safety in potentially explosive

areas has led C.E. to identify a safety-critical issue in the way high structures in hazardous areas were marked as obstacles to air traffic.

That is why, in the early 2000s, C.E. began to produce Aircraft Warning Lights for hazardous area with the brand name LUXSOLAR.

The choice to use LEDs as source of light, combined with high-tech optics and a patented cooling system, turned out to be the key elements of LUXSOLAR products' success.

Today the brand represents a wide range of AWLs and lighting solutions for applications to airfields, heliports, helidecks, Ex and marine environment and even more innovative products are at development stage. LUXSOLAR supports customers in the choice of the proper Lights configuration according to ICAO and FAA requirements.

CONFAPI INDUSTRIA TARANTO

✉ info@confapitaranto.it

🏠 www.confapitaranto.it

CONFAPI is the Italian association of small and medium-sized private industries. Since 1947 it has been protecting and promoting the interests of SMEs, which represent the fundamental structure of the Italian production system.

Confapi is the link between SMEs and the territory in its various facets, representing member companies in relations with institutions, public administrations, trade union, economic and social realities. We represent the voice of entrepreneurs and entrepreneurs who are confronted on a daily basis with the problems of production, the local market and international scenarios. The action of CONFAPI takes the form of territorial associations, active throughout the national territory, which

have as their institutional purpose the enhancement and development of SMEs and the protection of the multiple interests deriving from the exercise of business. Confapi has collaborations with universities and research institutes which, through a series of innovative activities and services aimed at digital transformation, technology transfer, innovation and research, allow our companies to know and implement the opportunity to increase their competitiveness both nationally and internationally. better application of the National Collective Labor Agreements. Confapi accompanies member companies on the path of internationalisation Confapi is very active in organizing conferences, meetings and seminars, press actions and public debates in order to update member companies, give them visibility and raise public awareness of the problems of SMEs.

DAVI – PROMAU

✉ info@davi.com

🏠 www.davi.com

DAVI, manufacturer of the most sold plate and angle roll worldwide, produces plate roll to roll up to a thickness of 400mm as well as heavy duty angle roll for beams up to a height of 1,250mm and pipes up to 1,000mm. All the products are completely made in Italy.

DAVI has been awarded 'Prime Company' and given maximum commercial reliability by Dun & Bradstreet and received the

Appreciation Award by NASA, thanks to the supply of two 'laser controlled' plate roll for the Orion project.

Recently, DAVI completely redesigned its range of plate and angle roll to offer higher performance solutions for the heaviest applications but also to provide customized and fully automated machines for high productivity needs.

Furthermore, 'DAVI customer care' follows the client from installation and training up to online and telephone support, providing care by the most experienced technicians in the industry.

DRILLMEC

✉ info@drillmec.com

🏠 www.drillmec.com

Drillmec is a worldwide leader in design, manufacturing and integration of full drilling rig and workover packages for onshore and offshore applications.

The results achieved in over 100 years of international experience have been recognized by customers worldwide and stem from our commitment to continuous improvement through the pursuit of high quality, strong focus on people and emphatic efficiency throughout the whole process.

At the core of our company's identity are three principles: safety, respect for environment and innovation.

Our vision is to become the preferred supplier in the onshore and offshore drilling industry providing our people and our

customers with a safe and healthy work environment and with a continuous focus on creating value for our customers and maximizing the return to our shareholders.

We strive to engineer world class products through innovation and technology to help our customers achieve top performance in the safest way.

We are constantly focused on foreseeing challenges before they arise and engineering technical solutions.

Our identity lies in our common goals, our attention to details, and our commitment to the communities in which we operate.

However, it is our passion for customer specific solutions, innovation and service that sets us apart from our competitors.

Our worldwide reputation of reliability reflects our extensive engineering development, timely deliveries and excellent customer care service.

ELETTROMECCANICA VIOTTO

✉ info@elettromeccanicaviotto.com

🏠 www.elettromeccanicaviotto.com

Elettromeccanica Viotto S.r.l. was founded in 1958, and is still family-run. It continuously expands its activity at the disposal of its customers both in Italy and abroad, constantly improving quality and professionalism, strictly adhering to delivery times and creating tailor-made solutions for each customer.

The company has consolidated experience in the construction, carpentry and machining sectors for the supply of complete plant machinery in the following sectors: steel, energy, chemical, petrochemical, nuclear.

In addition, the company is also involved in: the construction of spare parts in general, the construction and overhaul of electric

motors and electrical and electronic equipment, mechanical and electrical maintenance, the design and construction of precision components, mechanical machining and medium-heavy mechanical carpentry for industry.

The plant in San Donà di Piave, in the province of Venice, operates on a covered area of 15,000 square metres, where over ninety experts in the electrical and mechanical sectors work. The expansion and size of the new machinery meant that a second plant had to be opened about 800 metres from the main office.

Viotto also offers the market not only innovative and highly reliable products, but also an adequate after-sales service structured to guarantee the protection and functionality of its products.

FLUITEK ORSENIGO VALVES

✉ info@fluitekvalves.com

🏠 www.fluitekvalves.com

Fluitek Orsenigo Valves is an Italian global designer and manufacturer of engineered Gate, Globe, Check and Ball Valves for the Oil & Gas and

Power Industry since 1987. Manufacturing capabilities and expertise include exotic material in-house precision machining, highly qualified assembly, routine and special testing, packing, preservation and technical documentation, field service assistance. Fluitek Orsenigo Valves serve customers worldwide.

GBA FLARES & COMBUSTION TECHNOLOGIES

✉ sales@gba-flares.it

🏠 www.gba.com

GBA is an internationally based supplier of Combustion Equipment to the world's Oil and Gas, and Petrochemical Industries (see more at www.gba.com).

Our company was founded in 1985 and it mainly focuses of the engineering, design and supply of Flare Packages. During recent years, GBA has vastly expanded the product range of equipment that can be supplied. As a matter of fact, please find here below a complete list of the products offered by GBA:

- Flare Packages (Elevated Flares/Demountable Flare/ Enclosed Ground Flares etc.).
- Flare Gas Recovery Units (FGRU).
- Thermal oxidizers/Incinerators for waste gases and

liquids (Methanol, Benzene, Fuel Oil, Acroleine, etc.).

- SRU Tail gas incinerators.
- SRU reaction furnaces
- SRU RGG: Reducing Gas Generators.
- Direct Fired Air Heaters (UOP process, for instance).
- Combustors, for instance spent sulphuric acid (liquid) combustors.
- Vapor Combustion Units (VCU) for Vapor Recovery Systems, Bitumen Vapors.
- Recuperative solutions for Thermal Oxidizers, including Waste Heat Boilers (supply and detailed design by sub-vendors).
- Regenerative Thermal Oxidizer (RTO).
- Mobile combustion units.
- Burners.

ITALBEST VALVE

✉ info@italbestvalve.com

🏠 www.italbestvalve.com

ItalBest Valve is a worldwide qualified Italian valve manufacturer of API 6D ball valves, API 6DSS subsea ball valves, HIPPS valves, pressure balanced lubricated plug valves and triple eccentric butterfly valves.

Italbest Valve produces valves for all purposes and services, up to +650° C for very high temperatures and as low as -196°C for cryogenic applications.

Italbest Valve offers very competitive prices, a 100% Made in Italy product, a fast-track delivery service, a large in-house stock of products, API, ISO, FIRE SAFE, PAT, TAT, FET, PED, ATEX and other certifications.

We have experienced rapid growth in recent years, developing a foothold in major international markets. We have also been chosen as an official valve supplier for major multinational construction and energy projects around the world.

Quality lies with us.

ITALCONTROL

✉ info@italcontrol.net

🏠 <http://www.italcontrol.net>

Italcontrol, an Italian manufacturer with experience dating back to the beginning of the 90s in the field of valve testing and calibration, offers one of the most complete lines of high quality test bench units and special equipments for industrial valves and actuator testing and control as well as special design for all shut-off, control and safety valves according to the existing standards.

The various kind of specialized works carried out and problems solved, together with advanced product development and research into any new technology and solution allows Italcontrol to also offer highly specialized testing systems for extremely high hydraulic and

pneumatic pressures.

Italcontrol believes every product needs its own test bench, different requirements or special tests that could be on the norm and has made customized solutions one of his strong points.

In cooperation with his clients Italcontrol builds test bench units and special equipments among the most advanced in the world.

Present on all 5 continents through Agents and/or Distributors, Italcontrol is one of the major manufacturers of testing system on the market and his made in Italy style is also a synonymous with quality and efficiency.

Italcontrol commitment to his customers is to provide them with the highest quality customized products for any specific need satisfying their own technical specification!

NOVACAVI

✉ info@novacavi.it

🏠 www.novacavi.it

Specialist in custom electrical cables design and manufacturing for the most varied and challenging applications since 1975. NOVACAVI develops specific solutions as reliable high-quality accessories to any form of innovative technological equipment.

Focused on harsh and underwater environments cable solutions,

NOVACAVI designs and produces Aquancable®, wide range of special electrical cables for underwater technologies. Among them: ROV tethers, drones & robot cables, FO hybrid cables, umbilicals, subsea armoured and instrumentation cables.

Ranging from high flexible and light miniaturized cable configurations to rugged electromechanical armoured cables, NOVACAVI offers proven materials expertise, engineering versatility & production flexibility.

PETROL INSTRUMENTS

✉ info@petrol-instruments.com

🏠 www.petrol-instruments.com

PETROL INSTRUMENTS manufactures PD flow meters for liquids (double and single case), for industrial and custody transfer applications, master meters, control valves, tank provers and strainers entirely in its own factory in Italy.

Petrol products are always reliable with excellent performances, very reduced maintenance and low cost of ownership.

Product range from 1" to 16" with max flow-rate up to 2000 m³/h; wide

range of construction materials (carbon steel, cast iron, stainless steel etc.); wide range of accessories;

Excellent Accuracy and Repeatability; Low Pressure Drop; Compact Design; Long Service Life; Wide Range of Accessories; Conformity with International Standards: PED, ATEX, OIML R117, ISO 9001; International Approvals for Fiscal Applications: CEE approval, MIGAS, Russian, Nigerian, Chinese, Indonesian, Kazakhstan, Malaysian (SIRIM), Hellenic Approval.

Petrol Instruments PD flow meters are MID certified as a component for use in a measuring system as agreed within WELMEC.

ROBOZE

✉ info@roboze.com

🏠 www.roboze.com

Roboze is re-shaping the manufacturing industry and revolutionizing the world of 3D Printing with the most precise technology, capable of processing super polymers and composite materials for the realization of finished functional parts to be used in the most extreme conditions and sectors.

Roboze's attendance at OTC coincides with their co-chairing of the American Petroleum Institute's 20T and leading role in developing an additive manufacturing API standard for companies to use in greenfield or brownfield energy projects. API 20T membership is comprised of the largest global energy producers, service companies and EPCs (Engineering, Procurement, and

Construction companies). Roboze is actively leading this standardization effort along with major American and European energy operators.

Roboze has been at the forefront of innovation in the additive manufacturing industry, having been one of the first companies in the world to introduce PEEK in 3D printing. The company's industrial automation system and proprietary gear-based (beltless) technology allow the production of parts that are six times more precise than those made with belt-driven printers. Based in Italy, Roboze opened its U.S. headquarters office in Houston, a site selection influenced largely by the city's business-friendly environment and its position as the energy capital of the United States.

SAIP

✉ saip@saip.it

🏠 www.saip.it

With over 40 years of history, SAIP S.r.l. is now a brand synonymous with reliability, efficiency and excellent quality: intrinsic values for products recognised and appreciated worldwide. We produce a complete line of hydropneumatic accumulators and pulsation dampers, from bellow and membrane variations, to pistons and special accumulators designed to meet the specifications of our clients for even the most complicated of applications.

The SAIP S.r.l. site extends over 6.000 square meters of indoor area in Opera, an industrial hub on the outskirts of Milan. The site is well connected to the motorways and near to Milano Linate international airport. The company recognizes the importance of continuous improvement as a key factor in every aspect of its operations, in order

to achieve and maintain an advantage over its competitors. To boost growth, the company constantly strives to incorporate technological innovation, to upgrade its equipment and to actively monitor and keep up-to-date the skills and professionalism of its employees. The aim is to develop and increase production, by following precise guidelines:

achieve and maintain maximum production efficiency, in order to manufacture products at competitive prices in relation to the most highly qualified international competitors understand and address the needs

of the diversified market, from the petrochemical to the automotive industry, with flexible and dynamic solutions tailored to the needs of both smaller industries and multinational corporations

Thanks to its international network of distributors and specialized agents, SAIP S.r.l. is able to sell and provide assistance and technical support all over the world.

TECNICOMAR

✉ info@tecnicomar.it

🏠 www.tecnicomar.it

Since 1978, Tecnicomar develops and manufactures water treatment systems, sewage treatment plants and reverse osmosis fresh water generators. It is proud to supply its systems worldwide on board of yachts, navies, commercial ships, ferries and offshore applications.

Global leader in innovation, Tecnicomar has promoted R&D activity, finding solutions that meet market needs, improving its products and facing the challenges related to marine environment protection.

In order to prevent marine pollution and to meet the stringent sewage discharge standards, our company supports eco-friendly strategies for sustainable development.

Moreover, we can offer custom-made research for creating the best

solutions.

Tecnicomar has developed the Ecomar SX series, a very compact and reliable system, in order to reduce space requirements on board. Ecomar units are certified to the latest IMO MARPOL MEPC.227(64) Resolutions, including § 4.2 for the Ecomar S series.

R.O. watermaker: our the "SW8" series produce up to 60% more fresh water and consume up to 35% less energy than other desalinators of the same size. They are designed to produce large quantities of fresh water.

Nowadays Tecnicomar has a certified management system according to ISO 9001 and has also gained ISO 45001 certification, in compliance with the highest standards of quality and safety.

Designed and produced in Marsala, on the west coast of Sicily, Tecnicomar systems are supported by a global service network.

TECNOVIDEO

✉ info@tecnovideocctv.com

🏠 www.tecnovideocctv.com

TECNOVIDEO is an Italian company specialized in the design, development, and production of high-quality video surveillance systems. Since 1999 TECNOVIDEO manufactures innovative CCTV systems designed to resist in the most severe hazardous and corrosive environments such as Oil & Gas, Marine and Industrial critical infrastructures. Over the years the company has become a global player in supplying intelligent solutions for the largest and most prestigious projects worldwide. The company is known for its innovative solutions, designed to be reliable, easy to use, and offer high-performance capabilities. TECNOVIDEO also provides

TECNOVIDEO

CCTV SYSTEMS AND ACCESSORIES

a range of services to its customers, including technical support, training, and customization to meet the unique needs of their clients.

The company's technical support team is highly skilled and can quickly diagnose and resolve any issues that may arise with their products. TECNOVIDEO is made of a dedicated team of experienced professionals that will guide clients by means of customized solutions that assure productivity and peoples' safety. Our product range is characterized by the highest quality, reliability, and durability, they fit for application in the harshest environments.

TECNOVIDEO's team is passionate about your work and each day guides customers in selecting the right solutions to cater for their project specifications to achieve the maximum level of customers' satisfactions.

TME

✉ info@tmepc.it

🏠 <https://www.tmepc.it>

Mechanical Workshop specialized in the production of components for Mud Pumps, Drawworks, Crown and Travelling Block, Top Drive and mast. Engineering, Milling, welding and Assembly in house. API certified for 6-A, 7-1, 7K, 8C and Q1.

We started our Oil&Gas Know-how with Drillmec with the Fluid End for Mud Pump exactly. Then we developed our own product for the most famous brand applying the "Mission Style" concept on all the Mud Pumps. Through the reverse engineering we start to reproduce components for drilling machines. We usually repair Crankshaft and Connecting Rod for all the Mud Pumps. For Drillmec we supply components for MP 9T100, 12T1600, 14T2200; Drawwork 200HP; ETD250, GH1200E, MAS6000, MAS7000GD, MAS 7500 and many

Tecno Meccanica Emiliana s.r.l.

POMPE FANGO E COMPONENTI PER L'OIL & GAS
MUD PUMPS AND COMPONENTS FOR THE OIL & GAS INDUSTRY

many more machines. We manufacture everything in Italy, and all the our raw materials

come from Italy or Europe. Our customers are KCA DEUTAG, SAIPEM SPA, DRILLMEC, BREMBO, SICIM, MASSENZA, PERGEMINE, HYDRODRILLING, LP DRILLING. Starting from 2019 we developed projects for which engineering and project management has been fully provided.

These prototypes are machined, Inconel and Stellite overlaid and heat treated. Thanks to this we obtained 8 WPS and PQR (INCONEL, P91 on P91, Stellite gr 6 and Stellite gr. 21). With our Service department we have 3 technicians always in charge at Saudi Arabia KCA DEUTAG base that make CAT III and CATIV on Mud Pumps, Drawworks Crown and Travelling Blocks.

VALVITALIA

✉ info@valvitalia.com

🏠 www.valvitalia.com

Valvitalia is a global leading designer, manufacturer and supplier of equipment and components in the energy, marine and civil industries. On/Off, Control, Safety and Special Valves, Actuators, Fittings, Flanges, Monolithic Isolation Joints, Systems for the Oil&Gas as well as Fire Fighting Systems: these are the products offered by Valvitalia with a constantly careful approach aimed to satisfy customers needs, with production excellence and engineering perfection. Valvitalia has the largest product portfolio in the market and its

products are today installed in 113 Countries all over the world. Valvitalia is wherever there is a flow.

The long history of some brands that are part of the Group are a great heritage which allows the Company to experiment with new solutions to always find the best way to face every requirement.

The Group is well known and recognized from the market for handling very large-scale projects, even with a high degree of difficulty.

A 24/7 after sales service completes an offer which has the Customers' Satisfaction as its first goal.

VIAR GROUP

✉ info@viargroup.com

🏠 www.viargroup.com

VIAR Group is a leading manufacturer of turnkey forged items in carbon, clad, stainless, and super alloy steels to the most demanding specifications for the onshore, offshore & subsea markets.

Our vertically integrated supply chain offers in-house engineering, open and closed die forging, heat treatment, weld overlay / welding, machining and testing.

Our wide production range includes standard 'olets and fittings,

special flanges, clamp connectors (with certified complete interchangeability with the other main producers), integral barred tees and wyes from forged block, j-lay collars, buckle arrestors, anchor flanges, tapered joints and stress joints, forged pipes, bends, spools and many other special components to design, up to 30 tons, fully manufactured under the same roof, without any subcontracting.

This is translated into several advantages for our customers: Single Point of Contact for fully integrated solutions, risk mitigation, flexibility and quick deliveries, cost and schedule optimization. An organization fully tailored on our customers' needs.
