China's Railway Fixed-Asset Investment Reached RMB 363.2 Billion In H1 2026
In the first half of 2026, China's railway investment rose 2.1% year-on-year to RMB 363.2 billion ($53.8 billion), with 355.2 kilometers of new lines opened. Key projects advanced, including the Xi'an-Shiyan and Jinhua-Jiande railways. Several lines entered testing or static acceptance, while major projects like the Chengdu-Chongqing and Shanghai-Chongqing-Chengdu high-speed railways progressed steadily. **(CCTV)**

China's First Cross-Border Sea-Rail-Road "One-Document" Freight Train Successfully Launched
China launched its first cross-border "one-document" sea-rail-road multimodal train on July 21 from Yantai Port, carrying commercial vehicles. The 12-day route to Kyrgyzstan via train to Kashgar and truck cuts 5 days off traditional transport. The system uses a single bill of lading across all modes, streamlining customs and logistics with one-stop service. **(Xinhua)**

Guangxi-Launched China-Vietnam Freight Train Exports Rose 13.5% QoQ In Q2
In Q2 2026, China-Vietnam freight train shipments from Guangxi rose 13.5% quarter-on-quarter (QoQ) to 8,940 twenty-foot equivalent units (TEUs). H1 total reached 16,816 TEUs. Fruit imports via Pingxiang railway port surged 50.8% year-on-year to 2,276 TEUs. Trains now run daily, driven by RCEP trade growth and expanding cold-chain transport for ASEAN perishables like durian and coconut. **(Global Times)**

China Unveils five-year Plan for Civil Aviation Industry
China's civil aviation regulator released a development plan for the civil aviation industry during the 2026-2030 period. According to the plan issued by the Civil Aviation Administration of China (CAAC), the industry aims to achieve world-class standards in safety, service capacity and infrastructure by 2030, while securing major breakthroughs in technological innovation, green and low-carbon development, and governance capacity. **(The State Council Information Office of PRC)**

The Latest Data of the Civil Aviation Administration of China has been Released
The latest data of the Civil Aviation Administration of China showed that China's civil aviation industry maintained steady expansion in the first half of 2026, with total transport turnover rising 6.4% year on year to 83.37 billion tonne-kilometers. China's civil aviation industry will provide stronger support for major national strategies, boost regional economic and social development, and better meet people's needs for air travel. **(Xinhua)**
