discover it at
Middle East Stone 2022

5th- 8th December 2022
Za'abeel Halls 5-6
Dubai World Trade Centre, Dubai

Ministry of Foreign Affairs
and International Cooperation

Sustainability is **SustainabITALY**

In Europe, building and construction sector is responsible for 36% of annual CO2 emissions, 40% of energy consumption, 21% of drinking water and 50% of raw material extractions.

Sustainability is the new demand to which the entire sector of authentically natural stone is able respond, and for this reason we are presenting Italy at ME Stones 2022 with the motto: **Sustainability is Sustainab-ITALY !**

Italian technologies make natural stone even more able to play a primary role as a material in sustainable and green buildings, offering guarantees including:

- **control of amounts of rainwater**, stones can provide partially permeable pavements that mitigate rainwater flooding;
- **reduction of heat islands**: various types of natural stone, skillfully used for external pavements, building roofs and parking lots, can minimize the impact of the surrounding micro-climate;
- **maximization of energy savings in building management**: thanks to the different minerals they contain, using authentically natural stones can help reduce energy consumption for heating and cooling buildings, with a consequent reduction in CO2 emissions;
- **extension of existent buildings' lifecycles**: authentically natural stones are "eternal" if used in ways consonant with weather conditions and their performance characteristics and if given simple maintenance using modern methods of surface treatment and restoration;
- **the ability to recoup/recycle at end-of-life**: discards of authentically natural stone deriving from demolition and construction generate secondary raw materials of excellent quality and can be reused as ornamental coverings after simple surface treatment, to produce both aggregates and stabilizers for the building world.

Italian Trade Agency - ITA

ITALIAN TRADE AGENCY

TRADE AND INVESTMENT

OPEN DOORS TO A WORLD
OF OPPORTUNITIES

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy. With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses. Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

FIND YOUR ITALIAN PARTNER

ITA - Italian Trade Agency supports the business development of Italian companies abroad, increases business opportunities, improves the image of 'Made in Italy', promotes industrial collaboration and foreign investment in Italy. Find your Italian partner is a business directory with virtual showcases of Made in Italy companies. We offer you an overview of Italian businesses, including company profiles, products images and details, website, business proposals and contact information. Foreign companies or agent interested in Italian products or looking for partnership with Italian companies, can access the database with the profiles, searchable by sector or product, and find a business partner.

CONFINDUSTRIA MARMOMACCHINE

The Italian MARMOMACCHINE Association - briefly, CONFINDUSTRIA MARMOMACCHINE - is the Italian Association of Producers and Processors of Marbles, Granites and Natural Stones in general, and of Manufacturers of Machinery, Complete Plants, Tools and Complementary Products to quarry and processing Natural Stones.

The more than 320 companies and territorial consortia belonging to CONFINDUSTRIA MARMOMACCHINE, located in all the major Italian production districts, guarantee the association broad representation, in Italy and worldwide, as well as a role as sole sector interlocutor with ministries, ITA-Italian Trade Agency, Confindustria, standardization boards like UNI and CEN, labor unions, universities and polytechnics, Italian and foreign federations and associations, Tradefairs in Italy and around the world.

The association has always engaged in intense technical job training in Italy and abroad, organizing, managing and creating highly specialized educational programs and technological centers in various parts of the world, with the involvement of local governments, institutions and associations.

ABRASIVI ADRIA SRL

ABRASIVI ADRIA is an Italian company that has produced since 1981 abrasives and several items for the processing of granite, marble, stone and onyx. Over the years we have assembled an international team of highly skilled in-house trained engineers who operate on the main worldwide markets.

Our range of products includes:

- traditional abrasives;
- diamond metal bond tools;
- diamond resin bond abrasives

Our chemical laboratories are engaged in ongoing research and are constantly striving to provide innovative solutions. In this regard we can offer:

- Epoxy Systems for slab-resining and block-reinforcement;
- Mastics for gluing and plastering
- Sealers (protecting, impregnating and enhancing products);

Over the last fifteen years our Company has developed KEDIL, a parallel production line of material for the building industry. Its range of products comprehends glues for the laying of all kinds of floorings and the wall-cladding of all kinds of tiles.

BIANCO CAVE BY FATO STONE

Eighty years of experience, four generations of stone manufacturers, seven basins of extraction and two plants for the processing and transformation of the local top quality Italian Limestones:

- Lecce Limestone
- Grey Stone
- Ostuni White Stone
- Carparo
- Poggiardo Stone.

The wide range of quality and chromatic tones of our raw materials and the innovative concept of our operative approach is the final result of the strategic and industrial efforts of our Management, also thanks to the great attention in the most modern quarrying technologies and to our R&D Department focused on the constant development and control of the excellence of our products.

From our quarries – day by day – renewing the most ancient tradition of the Region of Salento - large blocks of stone are extracted, thanks to the professionalism of our specialized team of diggers, supported by the most modern equipment: all the materials extracted are transformed and processed to create the most impressive kinds of architectural design, construction or interior design satisfying the most sophisticated architectural needs.

BM OFFICINE MECCANICHE SRL

“BM S.R.L.” is the international most known brand in the sawing of slabs of stone market.

It was founded in the 1967 from Mr. Giovanni and Rino Bastianello.

The head office and the factory are located in the industrial area of Montorso Vicentino, in the North East of Italy. The special affective link to their own birthplace has inspired the name of the company and also the famous mark of the erected bear.

The activity of BM is specialized on the construction of gang saws for sawing marble and granite blocks, a crafting specialization that has guaranteed to gain and maintain international quality leadership.

The production range includes well known types of gang saws, and it is the largest of the reference market. All the machines have been enriched with technical innovations, specifically studied to give a precise answer to the problems of the traditional gang saws system and develop the most efficient solutions.

The products are sold all over the world, and thanks to the 50 years of experience, BM is able to guarantee personal solutions to every single customer.

C.M.M. SRL

EXCELLENCE AND UNIQUENESS AS A WINNING STRATEGY

The company, CMM srl, was founded in 2011 by its founder Vittorio Imperiali, a deep knowledge of Natural Stones and Apuan Marbles and a great expert in the stone industry, who for some years had already been involved in cultivation in Quarry No. 61 "Valpulita" in Carrara.

Particularly attentive to the dynamics of the markets and to the trends of architecture and design, the company immediately started a path of excellence by placing itself as a preferential interlocutor for the supply of high quality marble with intense aesthetic value, such as some varieties exclusive of Calacatta marble and Apuanmarble from its own quarries, as well as historical materials extracted from the "Moncervetto Piemonte quarry" in the Cuneo district and the Arabescato Ardesio.

DEGEMAR CAVE SRL

DEGEMAR Group works in the Roman Travertine District of Tivoli and Guidonia, close to Rome. The group founded by architect Vincenzo De Gennaro and his brother Leopoldo operates at international level in many countries in the World.

The availability of quarries with different qualities of Classico and Silver Travertine allows production of huge quantities of blocks, slabs and tiles according to specifications of architectural projects for public or private constructions.

From our quarries travertine was extracted to build many of the most famous palaces and monuments in Rome such as the San Peter Church in Vatican City and the Trevi Fountain, and many buildings in the world. Roman travertine is a construction material extremely precious thanks to its characteristics like compactness, durability and very nice beige color.

It is available in different sizes and thickness for flooring and wall-coverings cut-to-sizes for indoors and outdoors.

LAVORAZIONE PORFIDO L.P. SRL

Our family company has been working with Trentino porphyry with passion and enthusiasm since 1966. Passion, enthusiasm, determination, and competence are our keywords from over 50 years.

Porphyry, a volcanic stone, considered to be prestigious even in ancient times, still amazes today with its versatility, beauty, and unique characteristics, which make it perfect for paving driveways, town & city pedestrian areas and landscaping projects.

Our Prima Porphyry, with which numerous projects have been realized in 25 countries around the world and which have gained appreciation and important awards, can be used with natural cleft surface and machined surface.

With its natural cleft surface, its anti-slip characteristics, its colour nuances, it represents the best choice for projects where not only "a pavement" is requested but, "the stone" which can emphasize the beauty, add value, meeting designers' expectations.

This is porphyry, this is Prima porphyry.

MARMI FAEDO SPA

Marmi Faedo is an Italian company for 3 generations who work all kinds of natural stone, but we own, from multiple generations, a quarry of our exclusive GROLLA, a very hard stone with amazing and unique technical characteristics.

GROLLA is unique because it's quarried inside an old Volcano: water absorption is less than 0.3%, it doesn't stain, it's not attached by salt and chlorine, also its density makes it resistant to air pollutants.

Because is so hard and dense, we can work in any kind of weather condition, do projects like exterior cladding, pavings, swimming-pool, do special cut to size, solid pieces and in interiors we can work also in 1cm thickness in big size tiles, do solid sinks, bath or anything you want.

Very interesting is also our "MORE" catalog where you can find over 30 different surface textures for interior designers or architects.

MARMI GHIRARDI SRL

Marmi Ghirardi is the first and only stone contractor in Italy.

Thanks to the integrated system of skills, professionalism and problem-solving ability developed over 85 years (the company has been in business since 1938 and is led by the third generation of entrepreneurs), Marmi Ghirardi specialises in high-profile architectural and artistic projects in natural stone at every stage.

In addition to design consultancy and executive planning, the company has developed the brand G1938 - Italian Stone Maestro, which interprets Italian style in terms of refinement, quality and care for the details in the processing of materials and positions Ghirardi in the high-end luxury market.

MARMOELETTROMECCANICA SRL

As one of the pioneers of diamond tooling for the stone industry Marmoelettromeccanica is known for its special technologies and unique solutions.

Since the beginning the aim of the company has always been to provide the fabricators with the easiest and most efficient tools. This has helped the team to have several patented technologies and to have a fully internal production structure. This flexible system, which is certified by ISO9001, helps the R&D and production team to accept all custom designed tools received by the commercial team and to produce them in the quickest lead-time.

The year 2023 is going to be an important year for the team where the production will be relocating to the new mega-production which will make Marmoelettromeccanica the largest diamond tooling production company in Italy. Thanks to the new latest technology equipment which will be added to the production the team will be able to provide the market with new advanced products.

MGI - MARMI E GRANITI D'ITALIA

A long history, from 1948, with many challenges, that led MGI to be qualified, thanks to constant evolution, as a solid entrepreneurial reality. The Group is specialized in the worldwide supply of the best Italian materials for high-end interior design projects, from London to Dallas to New York City.

The development of advanced technologies and the constant aesthetic research together with the passion for artisan tradition are the essence of business growth and global expansion. MGI Group performs all phases of marble processing, from the extraction to the finished product, according to the ISO protocols and with a careful eye toward the environmental impact resulting from stone processing. The direct control on raw material allows the monitoring of all the production phases, from the block to the cut-to-size pieces. And the selection directly at the source ensures large quantities and high quality, two crucial issues for large-scale projects.

Marbles extracted in the owned quarries: Statuario Caldia® Calacatta Caldia® Cal'dor® Bianco Carrara Lapys Grey® Perlato Sicilia Cofano® Riviera Beige® Botticino Classico® Verde Issorie®.

OMAR CRANE SRL

OMAR CRANE Srl is a family-run Italian crane manufacturer based in Carrara, Italy. With around ten full-time employees and a working culture built on mutual respect and trust, the company has been able to build up a name which has continued to grow over the years.

The history of OMAR CRANE Srl began many years ago. It was the 1950s when Romano Ribolini started to work in the heavy machinery industry, during the particularly difficult and stagnant postwar period in Italy.

Ribolini learned how to repair tractors, trailers and other machineries, despite the difficulties in finding materials and spare parts. At the same time, realizing the importance of both small- and large-scale industry by simple, solid and reliable lifting equipment.

Ribolini started up a small, custom made mobile crane production company.

WATERJET CORPORATION SRL

Waterjet Corp. was set up in Italy in 1991 and operates as a manufacturer of NC machine tools for high-pressure waterjet cutting of stone, glass, steel and other materials.

The intense search for new technological solutions led to the new hydro-finishing system called Hydrofinish: an eco-friendly technology able to decorate the surface of different materials (floorings, claddings, objects and furnishing) with just a high-pressure water jet without using any abrasive.

The degree of erosion produces various finishing effects on the surface and together with the chromatic variety of each material preserved during the process, this results in decorative effects that cannot be reproduced with other technologies. Our solutions stand out for cutting accuracy, reliability and strong customization.
