Oman Sustainability Week

Message From The Italian Ambassador

Dear Guest,

It is our pleasure to welcome the Italian companies participating in the Italian Trade Agency Pavilion at the Oman Sustainability Week 2026 in Muscat.

Their visit to Muscat in challenging times for the region shows how strong and resilient is the relationship between Italy and Oman.

Each of the companies represented here embodies the excellence of the way Italians do business in highly technical sectors, connected to sustainability, energy transition, and environmental innovation.

Italy stands at the forefront of the green and digital transitions, with Italian companies achieving a remarkable level of specialization across a wide range of strategic supply chains and advanced technologies.

The participation of these companies reflects Italy's strong commitment to cooperate and work with Oman in order to promote innovative, sustainable, and efficient solutions capable of supporting future economic and industrial development.

I am sure that the Oman Sustainability Week 2026 will serve as a valuable platform for the exchange of expertise and best practices between our countries, while also fostering cooperation and new commercial opportunities for Italian businesses operating in this important sector and for their partners in Oman.

HE Pierluigi D'Elia

Ambassador of Italy to the Sultanate of Oman

Message From The Italian Trade Commissioner

Dear Guest,

It is my great pleasure to welcome you, on behalf of the Italian Trade Agency, to the Italian Pavilion at Oman Sustainability Week 2026.

Following the success of last year's participation, Italy returns to Muscat with an even larger Pavilion and a delegation of 18 Italian companies, all physically present in Oman to showcase their technologies, expertise and commitment to sustainable development.

This second edition reflects the growing strategic relationship between Italy and the Sultanate of Oman, as well as the increasing interest of Italian companies in supporting the objectives of Oman Vision 2040. Through this curated delegation, visitors will discover Italian excellence across sectors including energy transition, infrastructure, advanced technologies, smart mobility, engineering and environmental solutions.

The Italian Pavilion aims to serve as a platform for dialogue, partnerships and long-term collaboration between the Italian and Omani business communities.

We warmly invite you to visit our Pavilion, meet the participating companies and engage with our team to explore new business and investment opportunities.

We thank you for your interest and look forward to welcoming you.

Valerio Soldani

Dubai Office Director

Trade Commissioner to the UAE and Oman

FABCUBE

Roboponic is one of the projects developed in collaboration with FabCube srl and Aquaponic Design srl. It is a robotic platform for vertical farming in a controlled environment, designed to integrate cultivation, handling, internal logistics, monitoring, and post-harvest operations into a single automated process. The system uses a Cartesian gantry crane, advanced sensors, and modular tools to continuously and precisely manage transplanting, harvesting, inspection, and crop treatment operations. Its objective is to increase efficiency, traceability, and sustainability by reducing manual intervention and optimising the use of space, resources, and production flows.

APOGEO HOLDING

Apogeo Holding Srl, based in Rome, is an Italian company active in real estate, renewable energy and interior design. Through the establishment of Apogeo Global Solution LLC in Oman, the company is developing two innovative projects aligned with Oman Vision 2040.

The first initiative, Fabrica Italia Project (FAB.it), aims to create an industrial hub in Oman for the production of furniture designed in Italy and manufactured locally for the Gulf region, as well as export markets including India, Russia and East Africa. The project is based on a vertically integrated model using kenaf and bamboo cultivation to produce sustainable wooden panels. Powered entirely by solar energy, FAB.it is designed with a negative carbon footprint.

The second initiative, O.A.S.I.S. (Oman Agriculture Solar Integrated System), combines advanced Solar Aquaponic Farm technologies with solar energy and LED-assisted cultivation to produce fruits, vegetables and fish even in desert environments.

Through these projects, Apogeo Holding aims to support Oman's sustainability, food security and green industrial development objectives.
