Italy is continuously renowned as a leader in the fashion industry. It is the result of the excellence and innovative advances technology within the machinery system and construction in the textile industry. Various types of high-tech machinery are produced in order to compete in the global textile market and to meet every need and demand of the current dynamic fashion textile industry. Using the most advanced technology is an important tool to reduce the production costs, as it is capable of lowering the use of energy and raw materials. In this respect Italian textile machinery producers wish to offer the best solutions to the needs of the modern textile industry.

The Italian Trade Agency in cooperation with **ACIMIT (Association of Italian Textile Machinery Manufacturers)** will be present at the **INDO INTERTEX 2018** with the **ITALIAN PAVILION** at Hall BC No. 83 at JIExpo Jakarta to welcome Indonesian textile industry players who are interested in expanding their industry in capacity, quality and variety in order to be more competitive in the global market. Visiting Italian Pavilion will give the opportunity to view all Italian best solutions and contact Italian prominent textile machinery manufacture.
