ITALIAN TRADE AGENCY

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy.

With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses.

Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

AIR TECH ITALY

Air Tech Italy (ATI) is the leading Trade Association representing Italian companies specialized in supplying products, technologies and services for airports, civil aviation authorities and air navigation service providers.

The organization is the first point of contact for international clients looking for top-quality Italian companies. The main goal of the Association is to support airport operators, civil aviation organizations and air traffic service providers with the right solutions “Made in Italy” to cover their aviation needs.

The organization was founded in July 2020 under the institutional patronage of ENAC (Italian Civil Aviation Authority) to bring together leading Italian suppliers of solutions for the aviation industry in one strong organization.

Internationalization, Digitalization, Innovation and Sustainability are the main drivers of ATI members.

STAND C280/11

Italian Airport Industry Association

ATI supports its Members in networking and establishing collaborative relationships, providing them with practical assistance for business intelligence, business meetings, participation in business missions and international trade fairs.

AIR TECH ITALY MEMBERS

OICE

OICE is the employers' Association, belonging to Confindustria (the Confederation of Italian Industry), which represents Italian engineering, architectural and technical economic consulting organizations.

Founded in 1965 OICE unites 450 Italian engineering and architecture companies, big companies and most of the best qualified small and medium firms in the sector.

OICE operates in 4 major areas: representing and safeguarding category interests, promoting the culture of organized engineering, providing services for members and promoting internationalization of Italian Engineering.

OICE is member of FIDIC - International Federation of Consulting Engineers and EFCA - European Federation of Engineering Consultancy Associations.

OICE participates to the international activities and Italian Institutional missions, promotes special partnerships with the engineering Associations, sustains the participation of the Italian Consulting companies to the tenders organized by the International Financial Institutions (WB, EBRD, AfDB, ADB, IDB etc...).

Areas of specialization are urban and territorial planning, architecture, civil engineering, transports, environmental engineering, energy, agriculture and rural development

NOS – DIVISION OF LA CASCINA COSTRUZIONI

The NOS Division is a team of professionals with over thirty years of experience in the fields of wayfinding, signage, signs, furnishings and special projects. It combines the excellence of quality products with the utmost reliability in the services offered to customers, providing customised solutions.

The NOS Division has been operating in the airport sector for over thirty years, with a presence in approximately 90% of Italian airports and, for several years now, also in the foreign market.

On 1 January 2020, NOS S.r.l. became part of La Cascina Costruzioni S.r.l., a member company of the La Cascina Consortium. This addition brings added value thanks to its consolidated skills and experience, which integrate perfectly with the solid and widespread organisational structure of Cascina Costruzioni, which operates throughout Italy.

BATTOCCHIO

Battocchio SRL designs and manufactures membrane, touch, touch-like keyboards and advanced HMI solutions for professional control systems and high-reliability critical environments. Our human-machine interfaces are engineered for complex applications where operational continuity, precision, and safety are essential.

In the airport sector, our solutions are used in terminal management systems, control stations, self-service equipment, and operational infrastructures, ensuring reliable interaction even under intensive use.

By leveraging capacitive touch technologies, durable materials, and functional design, we develop intuitive, long-lasting HMI controls that can be easily integrated into both existing and next-generation systems.

TXT E-SOLUTIONS

TXT delivers a comprehensive portfolio of aerodrome services and advanced tailored digital solutions, focused on simulation, training devices, embedded software, digital twins, and XR systems. With over 30 years of experience in aviation, TXT combines technical excellence with deep regulatory expertise, including EASA and FAA certification standards, to design safe, efficient, and fully compliant operational frameworks.

The company is committed to supporting Airport Operators, Airlines, Ground Handlers, Air Traffic Services Providers, and Civil Aviation Authorities in addressing complex operational and training challenges. By leveraging integrated digital platforms, data-driven methodologies, and customized software architectures, TXT aims to optimize airport processes, enhance operational performance, and deliver actionable insights across increasingly complex aerodrome environments.
