-
- THE RIG is symbolic of Saudi Arabia's sustainable economic growth. It offers visitors a unique experience, and its design and operation have sustainability in mind.
 - It will follow leading global standards and best practices for environmental preservation.

The Rig-Masterplan

300,000m² of gross floor area

11 underwater restaurants

800 hotel rooms

Over 70 leisure attractions and activities

-
- The project will include three hotels with 800 rooms and 11 restaurants, a 50-berth marina, theme park and other associated amenities including swimming pools, water slides, rollercoasters, Ferris wheels, submersibles, karting, bungee jumping, jet-skiing, zip-lining and scuba.

-
- Discover how Vision 2030 is driving innovation and development in Saudi Arabia's tourism and entertainment industries, providing new and exciting experiences for visitors, and creating opportunities for economic growth.

-
- The tourist destination which will offer various sea sports and leisure activities aims to attract over 900,000 visitors by 2032. Visitors can reach the tourism destination through either of the two onshore terminals in Jubail Industrial City and Dammam City through seaplanes, helicopters and fast ferries.
 - the Rig project is in the design stage and the main contract is expected to be awarded during the third quarter of 2024.
